Create Lead

Add option to add new client here - which is linked to Zoho

Leads to Sales Order is not the right flow. Refer the following flow -

Client -> Drawing (Lead) -> Drawing ID Assigned -> Quotation Created (Quotation ID reference) combining multiple Drawing IDs-> if accepted, Sales Order (for client and internal tracking) and Purchase Order (for vendors)

When a quotation has to be created via Zoho - following informations needs to be linked.

Skip SKU, Unit -> HSN/SAC is important

Currently estimate forms a non-GST invoice

Drawing ID: DI04260005

Revision: 1

Revision tracking -> Add option to add revised drawings/STEP file -> Confirm revision -> Naming of anonymized - DI04260051.revA -- rev"N", N -> revision number

Upload STEP File

Allow STEP visualization

ad a Drawing PDF and STEP file.

☒ Pickup Scheduled 4/29/2026, 9:50:17 AM

☒ Material Received 4/29/2026, 9:50:09 AM

☐ Delivery Challan Received

If STEP A follows STEP B, B should not be checked before A

Parts to include:

DI04260001 -- × 1

DI04260002 -- × 1

DI04260003 -- × 1

⚠

No Zoho Sales Order linked to this order. DC will be created without a sales order reference.

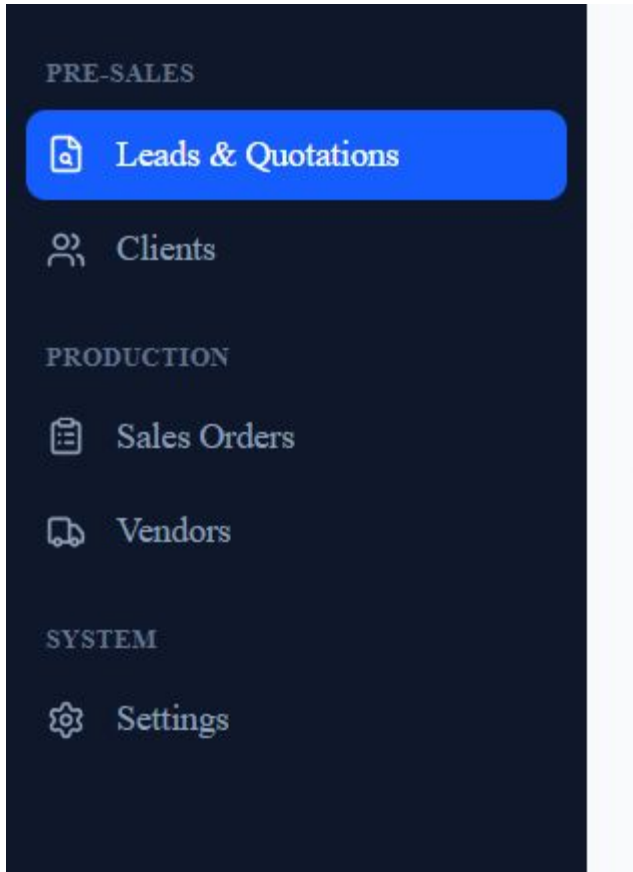

Cancel

Create in Zoho

DC for manufacturer to be created by Drawing ID

DC for client to be created with original names of parts given by the client, not drawing ID

DC creation -> option to select parts that are shipped and option to select client/vendor

This segregation - pre sales and production needs to be more clear -

Leads and Quotation deals only with generation of quotation. It should also keep track of accepted/rejected quotations

Once accepted, one can go to SO tab, select accepted quotation and generate SO
